Programa Monitora - relatorio 2014-2025

Elildo Carvalho Jr

Sumário

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

Introdução

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

Introdução

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

Métodos

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

Resultados

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

Agradecimentos

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

Disponibilidade dos dados

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

Referências

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

Anexos

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:
